Reasons for allowance

The following is an examiner's statement of reasons for allowance:

2. The prior art of record failed to teach or suggest individually or in combination a system of integrated circuit components defining a plurality of nodes and a random access memory (RAM) connected to each node, and wherein the system further comprises the uniquely distinct features: "access to the memory devices is limited, such that write access to a memory device may be performed only by functional units of the associated node" (as per claims 1, 11, 15 and 19). These distinct features of the present claims invention have not found to be anticipated, suggested or made obvious by the prior art of record, either singularly or in combination.

3. The prior art of record failed to teach or suggest individually or in combination a method for performing geometry accelerator computations in a distributed, nodal architecture graphics systems, wherein the method comprises the uniquely distinct

steps of: "distributing messages over a plurality of geometry accelerator work queues, propagating to an output of each geometry accelerator all messages that are directly executable by the geometry accelerators', and producing, by each geometry accelerator a work queue for shaders, wherein the work queue for shaders comprise messages denoting drawing primitives" (as per claim 23). These distinct features of the present claims invention have not found to be anticipated, suggested or made obvious by the prior art of record, either singularly or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
